

Logan Bell Housing PTO's For Power Generation

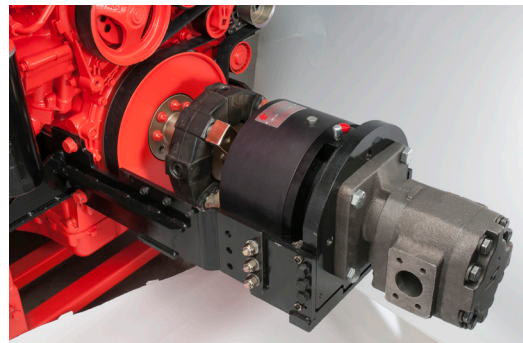

Scania D13 Series 650 HP (478 kW) pictured with Logan LC-314 Bell PTO 2702 lb. ft. (3664 Nm) for main propulsion and Logan front PTO 1000 series clutch, 1000 lb. ft. (1356 Nm) to drive an auxiliary pump

Standard Logan Bell Housing PTO's are available in No. 00 to No.7 size SAE Bells. This application required a Logan LC-314 (No. 01 Size Bell), Clutch for main propulsion and a Logan SAE Direct Drive PTO (1000 series) to drive an auxiliary pump with an SAE C spline off the front of the engine.

Fluid /Air Actuated, and Self Adjusting

Logan Front PTO's act as connect/
disconnect for auxiliary pumps
