

## Gas manifold accessories

**Gas pre-heater: GVW 250**
**Type GVW 250 for gas cylinder or bundle and gas manifold systems**

- for the efficient heating process of highly compressed inert and non-corrosive gases
- helps to prevent the icing of the downstream accessories by heating the medium
- guarantees reliability during continuous operation through double temperature control which prevents overheating
- equipped with plug, 2 m cable, with connections for the different gas types and a light-emitting diode (green) for "Heating ON"

**Maintenance:**

Visual inspections for damages or contaminations are to be carried out periodically.

Gas pre heaters are only to be opened and repaired by the manufacturer!
