

## What is OxyGo?

The OxyGo® family of portable oxygen concentrators (POC) is designed to keep oxygen patients—like you—GOING!

An OxyGo POC is a lightweight medical device that takes the air around you and converts it into the oxygen prescribed by your doctor.

The OxyGo family has two members:

**OxyGo NEXT™**  
and **OxyGo FIT™**

Both are industry leaders in reliability, usability and quality. And all are designed to be used 24/7... so they can supply the medical oxygen you need at home or on the go.

OxyGo is different from other POCs because it shows you exactly how much time you have left on the battery, and you can change the battery easily. You can also charge OxyGo and use at the same time—either in the car or at home!

## Will OxyGo work for me?

OxyGo NEXT and OxyGo FIT are available by prescription only. If you have been prescribed oxygen, there is a good chance that a member of the OxyGo family will work for you. However, you will need your oxygen provider to perform an oxygen assessment to see if you can saturate with OxyGo.

**OxyGo® is ready to go  
when you are!**

Whether you are out on the town or home with family—now you can always have your oxygen with you. Learn more at: [www.oxygo.life](http://www.oxygo.life)

Your OxyGo Provider:

## Are you a medical professional?

OxyGo has been designed to saturate patients 24/7... and its pulse dose is sensitive enough to provide most patients with the prescription required.

OxyGo is available with local support through your area oxygen provider.
