### Designed to Follow You Anywhere!

OxyGo portable oxygen concentrators (POCs) are lightweight medical devices that can make the medical oxygen your doctor prescribed from the air around you. With OxyGo, you never need to worry about running out of oxygen and you don't need to carry heavy tanks!

OxyGo is different from other POC brands because the units show you exactly how much time you have left on the battery. Plus, you can change the battery easily and use it at the same time—either in the car or at home!

All OxyGo POCs are designed to be used 24/7, so they can supply the medical oxygen you need at home or on the go!

\* Double cell battery, setting 1. \*\* Flow setting 2.

‡ Available on OxyGo FIT POCs produced after 2/19 and OxyGo NEXT.
