## OxyGo keeps patients going — plus local provider support to ensure they get the best care.

As a family-owned and operated company, we believe the highest quality of care comes from the highest quality product—plus close interaction and monitoring. We provide the highest quality product, but realize that local providers will be able to offer patients much more dedicated attention and service. That is why we do not sell OxyGo or its accessories directly to patients. This "teamwork" mentality clearly makes OxyGo the right choice to keep patients' oxygen needs satisfied, along with giving them the high standard of care they deserve. OxyGo Portable Oxygen Concentrators are the same patient-demanded, reliable concentrators as seen on TV—backed by the care and attention of the patient's local provider.
