

SPOONER SAFETY SERVICES

Spooner's safety team has extensive experience in helping develop and implement programs designed to improve safety compliance - reducing work-related injuries, lowering workers' comp costs, and limiting regulatory exposure.

Spooner Inc. provides training and support in the following areas:

- Written safety program creation, reviews and gap analysis
- Full OSHA Standard Training: LO/TO, forklift operator licensing, HazCom/GHS, confined space, PPE and more
- OSHA 10 & 30 hour card courses
- First Aid, CPR, AED, and BBP training
- OSHA recordkeeping training & reviews
- Machine guarding & equipment assessments
- **OSHA investigation assistance: from abatement efforts, informal conference management, through settlement agreement and closing the case**

Spooner Inc. safety professionals can also provide assistance with:

- Qualitative fit testing & respirator program/training development
- Occupational noise exposure monitoring
- Heat stress monitoring & heat illness-related programs
- **Onsite mock-OSHA audits to proactively identify and correct deficiencies**
- Emergency action planning & mapping design
