

zentra™

Making Access Convenient

Unleashing the Power of Zentra

Built with Top-Tier Schlage Hardware

Secure resident units with Schlage Control® or XE360 electronic locks

Schlage offers hardware solutions for virtually every opening

Flexible credential options include physical fobs, unlimited Bluetooth mobile credentials, and resident key in Apple Wallet for a seamless resident experience

Schlage Reader Controllers and IP-Bridges allow properties to manage common area and perimeter access within Zentra

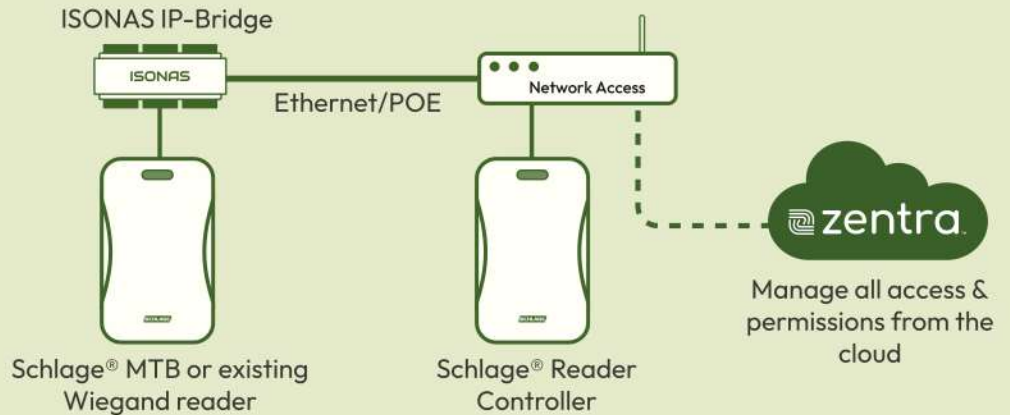

Unlocking Zentra's Potential:

Exploring Zentra's Communication Protocols

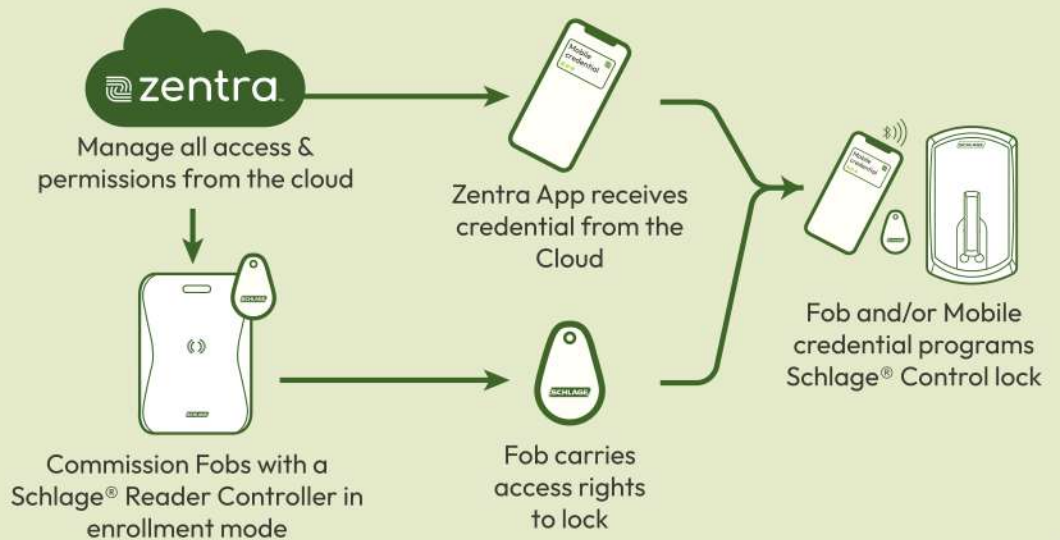

Real Time Architecture

Zentra's cloud based architecture allows properties to update access privileges and schedules in real time through the network.

No-Tour Architecture

Eliminate the need to visit the locks by using 13.56 MHz smart or Zentra Mobile Access Credentials to deliver updates to access rights. Available on Schlage Control smart locks, NDE and LE wireless locks, XE 360, and CTE.

Wi-Fi Architecture

Connect devices to the Wi-Fi network for automatic daily updates. Available on Schlage NDE and LE wireless locks, XE 360, and CTE.

Access Simplicity

Centralized Database

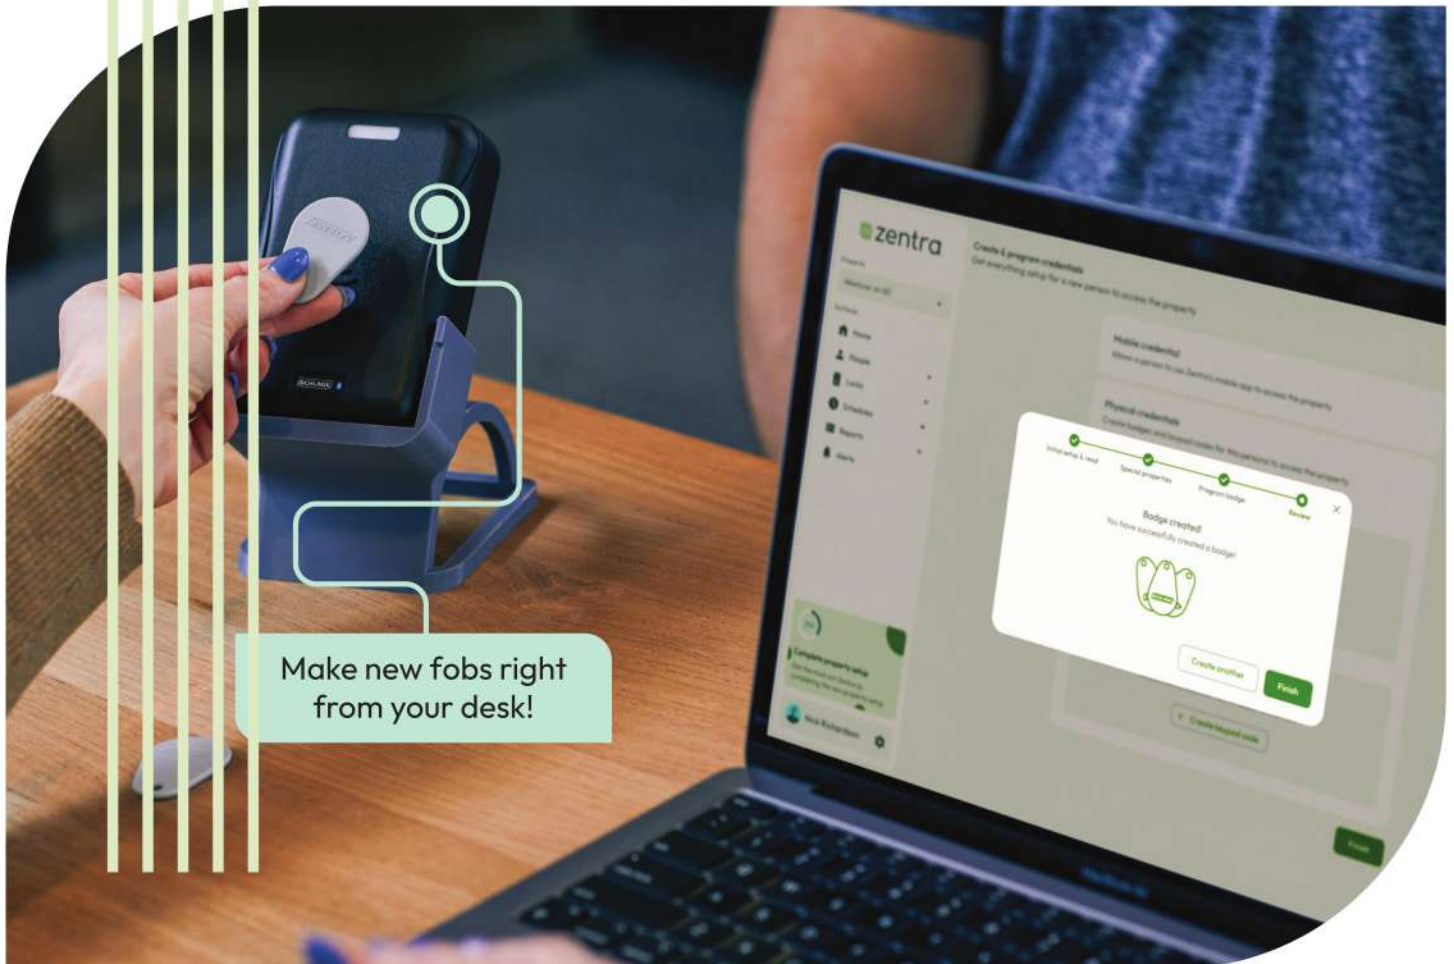

No more managing multiple systems for access control. Zentra controls all property access points in one central location.

Simple Workflows

Zentra's system was designed with input from real property managers to make every day processes like move-ins and outs and granting vendor access simple and powerful.

Robust Reporting

Zentra's reporting allows for easy access and visibility to audits, as well as the ability to pre-schedule automatic reports.

Make new fobs right from your desk!
